D-FINE BLOCKCHAIN  
SOLUTIONS:  
FROM ENTERPRISE  
BLOCKCHAIN TO  
TOKENIZATION

d-fine

A background network diagram consisting of numerous blue and grey nodes connected by thin lines, creating a complex web-like structure.

## ENTERPRISE BLOCKCHAINS

**Reinvent existing business lines through efficiency gains, reduced risks or create novel (platform-) business models that were not easily possible before.**

### **Our offering**

- Full-service offering for DLT projects
- Conceptual design and business analysis
- End-to-end implementation including set-up of the DLT infrastructure and smart contract development
- d-fine DLT lab environment for prototyping allows a rapid start of the implementation
- Technologies used include Ethereum, Hyperledger Fabric or Corda

### **Project example**

Implementation of a debt capital markets issuance platform based on Hyperledger Fabric.

## TOKENIZATION AND INITIAL COIN OFFERING

**Your business on the blockchain through creating your own token that can represent ownership or utility and create the right incentives in the ecosystem.**

### **Our offering**

- Token engineering: token design and analysis along economic, technical, functional dimensions and programming of the smart contracts
- Structuring and planning of the ICO including phases, caps, price discovery, vesting, etc.
- Implementation: d-fine ICO framework consists of technical infrastructure, tools, best-practices and checklists

### **Project example**

End-to-end implementation of an initial coin offering, including the development of smart contracts and set-up of the blockchain infrastructure.

## DIGITAL ASSET SERVICES

**Enter the crypto-currency world through offering services to retail clients or businesses.**

### **Our offering**

- Support of clients to create new services in the developing market infrastructure for digital asset
- Bespoke solutions for services like digital asset custody, brokerage, crypto funds, derivatives and others
- Support form identification of the market need, shaping of the solution to actual programming of the application

### **Project example**

Security procedures and technical implementation of a custody solution for the highly secure storage of digital assets.
